

BAS CLUB MEETING - Minutes
BAS Club Field
July 20, 2023

The meeting was called to order at 6:30 pm by President Greg Cooper.

There were 4 members in attendance.

Officer Reports:

Safety Officer Bill Mansfield had no safety related news.

Membership Chairman Bill Mansfield reported that we are now at 80 members, and we have 29 float fliers. He gave an envelope of new member checks to Al Coelho, who will transfer them to Dean Ehn.

There was no Float Fly report, but a discussion was had applauding the boat dolly and the process to get the boat to the water.

Webmaster Mike Gulizia reported that the Dean Chandler memorial note has been removed from the website after one month. Also, once the site listing all of Dean's models and equipment for sale is complete, he will put a link on the BAS website.

No Secretary Report

No Treasurer Report

Old Business:

Greg had received a quote from Weed Wranglers for \$695, and it included spraying 20 feet out from the edge of the runway. He told the company to only spray 2 feet around the runway. We will mow out to the 20 foot line.

Greg has arranged for a notice about Dean Chandler in the AMA Model Aviation magazine District IX News, and also have his name added to the AMA Final Flights section. He believes that something will be published in the August magazine.

Greg talked to Superior Aggregates about the resurfacing. The cost for crack fill on the runway and taxiway, top seal on the runway, and repainting the stripes will be \$7422. This was approved and will be scheduled for September.

The city provided Red Flag Warning sign now has the correct address and is posted on the front gate.

New Business:

Joe Sherran discovered that small bees were nesting in the charging station plugs. He cleaned them out and put covers on the plugs. Thanks to Joe for doing that. Be sure to replace the plug covers after you're finished charging up.

The meeting was adjourned at 6:45 pm

Respectfully submitted,
Mike Gulizia, Webmaster
